PROFESSIONAL SUMMARY

Computer Science and Information Technology graduate with hands-on experience in data handling, analysis, and visualization using Python and Excel. Proven ability to identify issues, document findings, and communicate insights through a technical support internship and data-focused workshops. Eager to bring analytical and technical expertise to a data analyst role, helping teams improve processes and make better decisions through data.

EXPERIENCE

IT Support (Internship)

Feb – June 2025

J&T Express, Jakarta

- Supported client onboarding by resolving technical issues and clarifying system usage, contributing to a smooth onboarding experience
- Built and enhanced frontend components to integrate with internal company systems
- Assisted in software testing by identifying, documenting, and reporting bugs to improve system usability and reliability
- Contributed to the development and testing of a customer support chatbot, supporting automation of common user queries

Training Manager

2023 - 2024

Robogals, Jakarta

- Co-delivered a GitHub 101 workshop on version control and collaboration workflows
- Co-delivered a Data Scraping workshop for high school students, teaching foundational data collection and analysis concepts
- Supported workshop planning and coordination to ensure effective delivery and participant engagement

PROJECTS

Open Source Library Maintenance (turf_dart)

2026

Scalabs.ai — via University Industry Project Program

- Contributed to turf_dart, an open-source geospatial library, collaborating with an international client through an industry-partnered university program
- Merged 4 pull requests to the production library, implementing features including flip geometry, center of mass calculation, coordinate member support, and Mercator/WGS84 coordinate transformation functions
- Led development of a Flutter web application to showcase geospatial library capabilities, integrating Flutter Map to provide interactive visualizations of turf_dart functions for stakeholder presentation

Pureleaf Supply Chain Management System

2024

Group Members – 7 members

- Contributed to UI/UX design using Figma for the supply chain web application

- Developed frontend authentication module including login and register pages using React, Vite, and CSS
- Part of a larger fullstack system with a Python REST API backend
- GitHub: github.com/WADSFinalProject/Pureleaf-WebLogin

Tsunami Prediction ML

2024

Python · scikit-learn · XGBoost · Jupyter

- Compared 6 supervised ML models on a tsunami dataset with full EDA, hyperparameter tuning, SHAP analysis and ROC AUC evaluation
- GitHub: github.com/FelAmore/tsunami-prediction-ml

Corect Fitness

2025

React · Python · MediaPipe

- Built an AI fitness posture assessment web app using real-time MediaPipe skeleton tracking via webcam with a Python backend
- GitHub: github.com/FelAmore/Corect-Fitness | Live: corect-ai-fitness.vercel.app

Clothing Review Web App

2026

Python · Flask · scikit-learn · NLTK

- Built a fullstack clothing review app with NLP preprocessing pipeline, Logistic Regression sentiment model, and Flask web interface
- GitHub: github.com/FelAmore/clothing-review-app

EDUCATION

Bachelor of Computer Science & Bachelor of Information Technology (Double Degree)

2026

Binus International, Jakarta, Indonesia & RMIT University, Melbourne, Australia

LANGUAGES

Bahasa Indonesia – Native | **English** – Fluent | **Mandarin** – Proficient

SKILLS

Hard Skills: Python | Java | Git and GitHub | SQL | Excel | Word | Data Analysis & Visualization | Data Scraping | Software Testing | AWS Cloud Computing | Technical Support

Soft Skills: Problem Solving | Analytical Thinking | Communication | Collaboration

CERTIFICATIONS

- **Microsoft Excel Basic to Advanced: Fullstack Intensive Bootcamp**, MySkill – 2026
- **AWS Certifications (Cloud Computing)**, AWS Training and Certifications – 2024
- **Introduction to Programming Using Java**, Great Learning – 2023
- **Introduction to Programming Using Java**, HackerRank – 2023
